SUMMARY

Principal Software Engineer with 10+ years of experience building and owning cloud-based applications and integrations. Currently working in the Genesys Cloud CCaaS ecosystem, with end-to-end ownership of customer-facing connectors and applications across ServiceNow, Microsoft Dynamics, Salesforce, Pega, WFM, and Amazon Connect. Experienced in customer requirements, solution design, architecture, development, certification, deployment, and customer enablement.

WORK EXPERIENCE

GENESYS | Principal Software Engineer Pune, India | Jun 2024 – Present

- Own customer-facing applications and integrations end-to-end, from customer requirements and solution design through development, certification, deployment, and customer enablement.
- Own and maintain the ServiceNow connector, serving 30+ customers; gather requirements, implement features, troubleshoot issues, manage certification, and publish releases to the ServiceNow Store.
- Published and maintain two certified ServiceNow plugins, owning their complete product lifecycle and ongoing enhancements.
- Contribute to CRM connector development and enhancements across Microsoft Dynamics 365, Salesforce, and Pega.
- Designed and developed multiple Workforce Management (WFM) applications, including WFM Helper, OT/VTO, and Time Off applications.
- Built WFM Helper to support asynchronous bulk movement and scheduled assignment of agents across business units, management units, staffing groups, work plans, skills, queues, and work teams.
- Developed OT/VTO capabilities that allow customers to publish overtime or voluntary time-off opportunities for agents to claim, and Time Off workflows for agent requests.
- Contributed to Bring Your Own Interaction (BYOI) using Amazon Connect, enabling voice, email, and chat interaction events to be brought into Genesys for centralized monitoring and analytics.
- Work directly with customers on requirements, feedback, bugs, enablement, and solution discussions while independently driving technical execution.
- Own design and architecture for assigned initiatives, including implementation and architecture reviews as an individual contributor.
- Adopted AI-assisted engineering workflows using Claude, Codex, and Cursor to improve development efficiency and automate repetitive engineering tasks.

HITACHI DIGITAL SERVICES | Senior Consultant Pune, India | Jul 2021 – Jun 2024

- Implemented event-driven and serverless solutions using AWS Lambda, EventBridge, Step Functions, S3, SES, and IAM.
- Implemented publish-subscribe architecture to coordinate microservices and dynamically update application configurations.
- Automated data migration and cache re-hydration workflows using AWS Step Functions.
- Built cross-account S3 file transfer workflows using EventBridge and IAM roles.
- Developed dynamic email notification and document-generation capabilities using AWS SES, Handlebars, and Puppeteer.

DOCTORC | Full Stack Developer Hyderabad, India | Nov 2020 – Jun 2021

- Developed product features using Django and React.
- Integrated Razorpay for payment processing and WhatsApp Business API for customer notifications.
- Developed native Android functionality for camera-based scanning and image uploads.

PROPELLOR.AI | Frontend Developer Pune, India | Jul 2019 – Nov 2020

- Led frontend development using Angular, including feature planning and delivery for a multi-tenant SaaS platform.
- Designed tenant onboarding and isolation strategies for the platform.
- Built an in-house visualization library using D3.js and ECharts, including funnel and heat-map visualizations.
- Developed and maintained Node.js backend services and REST APIs using AWS API Gateway and related cloud services.
- Integrated AWS X-Ray for application performance analysis and Chargebee for subscription billing.

TECH MAHINDRA LTD. | Senior Software Engineer Pune, India | Aug 2016 – Jul 2019

- Developed and maintained backend services and integrations for enterprise ticketing platforms using Node.js and Perl.
- Built Angular-based dashboards to visualize ticket performance and SLA metrics.
- Integrated the ELK stack to improve ticket search and resolution discovery.
- Integrated and maintained Rocket.Chat-based services for ticket-related conversational workflows.

EDUCATION

Bachelor of Technology in Electronics and Instrumentation | Krishna Institute of Engineering and Technology | Ghaziabad, UP | 2016

CERTIFICATIONS

Oracle Cloud Infrastructure (OCI) Foundations Associate | Oracle Cloud Infrastructure (OCI) AI Foundations | Genesys Customer Success — Certified AI Strategist

SKILLS

Languages: Python, JavaScript, SQL, Perl Frontend: React, Angular, HTML, CSS Backend: Node.js, Django, Express.js
Cloud: AWS (Lambda, S3, SQS, Step Functions, EventBridge, SES, API Gateway, CloudWatch, X-Ray) Databases:
PostgreSQL, Redis, Elasticsearch, MongoDB, DynamoDB
CCaaS / CRM: Genesys Cloud, ServiceNow, Microsoft Dynamics 365, Salesforce, Pega, Amazon Connect AI: Claude, Codex,
Cursor
Other: Git, Linux, NGINX, JIRA, REST APIs
